

GI Jonny, now with telescope ass

October 2007

Ummm....this clip is not something you should send to your mom. But if you want to educate college (or high school) students that the risk of HIV is still very real, it's spot on.

And, there's [a website too](#) - where GI Jonny fans can watch the clip again - *and* get very real educational information. There's even details on how to sponsor your own GI Jonny event. Go, Jonny.
